

Assignment – 6

1. Create a webpage that displays the div element with the following CSS properties.

- Set the border as 2 pixels solid
- Set the padding as 20 pixels
- Set the background as #dddddd
- Set the border top left radius as 2em

```
<!DOCTYPE html>
<html>
<head>
  <meta charset="utf-8">
  <title>Div_Style1</title>
  <style>
    div {
      border: 2px solid;
      padding: 20px;
      background-color: #dddddd;
      border-top-left-radius: 2em;
    }
  </style>
</head>
<body>
  <div>
    This is a div element with a 2px solid
    border, 20px padding, background #dddddd and a
    top-left radius of 2em.
  </div>
</body>
</html>
```

2. Create a webpage that displays the div element with the following CSS property.

- Set the text shadow as h-shadow

```
<!DOCTYPE html>
<html>
<head>
  <meta charset="utf-8">
  <title>Task 2</title>
  <style>
    div {
      text-shadow: 5px 0px 3px rgba(0,0,0,0.5);
      border: 1px solid #999;
      padding: 10px;
    }
  </style>
</head>
<body>
  <div>
    This div has text with a horizontal text-
    shadow.
  </div>
</body>
</html>
```

3. Create a webpage that displays a white text with black shadow.

```
<!DOCTYPE html>
<html>
<head>
  <meta charset="utf-8">
  <title>Task 3</title>
  <style>
    body {
      background: #333;
    }
    div {
      color: white;
      text-shadow: 2px 2px 4px black;
      padding: 20px;
      border: 1px solid #ccc;
    }
  </style>
</head>
<body>
  <div>
    This text is white and has a black shadow.
  </div>
</body>
</html>
```

4. Create a webpage that displays an image as the border around an element with the following properties.

- Border: 15 pixels solid
- Padding: 20 pixels
- Border image: url (imagename.png) 30 30 stretch

```
<!DOCTYPE html>
<html>
<head>
  <meta charset="utf-8">
  <title>Task 4</title>
  <style>
    div {
      border: 15px solid;
      padding: 20px;

      border-image: url('imagename.png') 30 30
stretch; /* shorthand usage */
      border-style: solid;
    }
  </style>
</head>
<body>
  <div>
    This element displays an image as the
border (with 15px solid base), and 20px
padding.
  </div>
</body>
</html>
```

5. Create a webpage that displays an image as the background around an element with the following

properties.

- Border: 1 pixels solid black
- Height: 150 pixels
- Width: 180 pixels
- Background : url (imagename.gif)
- Background-repeat: no-repeat
- Background-size: cover

```
<!DOCTYPE html>
<html>
<head>
  <meta charset="utf-8">
  <title>Task 5</title>
  <style>
    div {
      border: 1px solid black;
      width: 180px;
      height: 150px;
      background: url('imagename.jpg') no-repeat;
      background-size: cover;
      background-position: center;
    }
  </style>
</head>
<body>
  <div>
    <!-- background image shows -->
  </div>
</body>
</html>
```
