

1. Create a webpage that displays an image as the background of the page and set the background image position to the right top.

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <title>Background Image</title>
  <style>
    body {
      background-image: url('your_image_name.jpg');
      background-position: right top;
      background-repeat: no-repeat;
      background-size: cover;
    }
  </style>
</head>
<body>
</body>
</html>
```

2. Create a webpage that has a background color and a background image.

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <title>Background Color and Image</title>
  <style>
    body {
      margin: 0;
      padding: 0;
      height: 350px;

      /* Background color (visible where the image is
transparent or doesn't cover) */
      background-color: hsl(228, 54%, 80%);

      /* Background image */
      background-image: url('your image_name.jpg');
      /* Replace with your image path or URL */
      background-repeat: no-repeat;
      background-position: center;
      background-size: contain;
      /* Adjust as needed (e.g., contain, auto, etc.) */
    }
  </style>
</head>
<body>
</body>
</html>
```

3. Create a webpage that displays different background color for different elements.

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8" >
  <title>Different Background Colors</title>
  <link rel="stylesheet" href= "style1.css" type="text/css">
</head>
<body>
  <header>
    <h1>Header Section</h1>
  </header>

  <nav>
    <p>Navigation Menu</p>
  </nav>

  <main>
    <p>Main Content Area</p>
  </main>

  <footer>
    <p>Footer Section</p>
  </footer>
</body>
</html>
```

style1.css

```
body {  
    margin: 0;  
    font-family: Arial, sans-serif;  
}  
  
header {  
    background-color: #3498db;  
    color: white;  
    padding: 20px;  
    text-align: center;  
}  
  
nav {  
    background-color: #2ecc71;  
    padding: 15px;  
    color: white;  
}  
  
main {  
    background-color: #f1c40f;  
    padding: 30px;  
    min-height: 200px;  
}  
  
footer {  
    background-color: #e74c3c;  
    color: white;  
    padding: 15px;  
    text-align: center;  
}
```

4. Create a webpage that displays an image as the background and also repeats the background image only horizontally.

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8" >
  <title>Horizontal Repeating Background</title>
  <style>
    body {
      height: 50px;
      background-image: url("image_path.jpg");
      background-repeat: repeat-x; /* Repeat only horizontally*/
      background-position: center;
      background-color: #e0e0e0;
      background-size: 100px;
    }
  </style>
</head>
<body>
</body>
</html>
```

5. Create a webpage that displays an image as the background and also repeats the background image only vertically.

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8" >
  <title>Horizontal Repeating Background</title>
  <style>
    body {
      height: 50px;
      background-image: url("image_path.jpg");
      background-repeat: repeat-x; /* Repeat only vertically*/
      background-position: center;
      background-color: #e0e0e0;
      background-size: 100px;
    }
  </style>
</head>
<body>
</body>
</html>
```

6. Create a webpage that displays the text in different colors for each element.

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <title>Text in Different Colors</title>
  <link rel="stylesheet" type="text/css" href="style2.css">
</head>

<body>

  <h1>Main Heading</h1>
  <h2>Subheading</h2>
  <p>paragraph with green text, design with css color.</p>
  <p>Here is a <span>highlighted word</span> in orange using a
span element.</p>
  <footer>Footer text in purple color defines the bottom of the
page.</footer>

</body>
</html>
```

style2.css

```
body {
  font-family: Arial, sans-serif;
  margin: 20px;
}
h1 {
  color: #e74c3c;
```

```
}  
h2 {  
  color: #2980b9;  
}  
p {  
  color: #27ae60;  
}  
span {  
  color: #f39c12;  
}  
footer {  
  color: #8e44ad;  
}
```

7. Create a webpage that displays the div element with the following text properties.

- Text color: Magenta
- Text alignment: right
- Text decoration: underline
- Text transform: uppercase
- Text indent: 60 pixels

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <title>Styled Div Text</title>
  <style>
    .text-style {
      color: magenta;
      text-align: right;
      text-decoration: underline;
      text-transform: uppercase;
      text-indent: 60px;
    }
  </style>
</head>
<body>

  <div class="text-style">
    This is a styled div element with custom text properties,
    such as;text-color, text-align,text-decoration,etc.
  </div>

</body>
</html>
```

8. Create a webpage that displays the div element with the following font properties.

- Font family: Verdana
- Font style: italic
- Font size: 20pixels
- Text align: left
- Font weight: bold
- Text color: Red

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8" >
  <title>Font Properties</title>
  <style>
    .font-style {
      font-family: Verdana, sans-serif;
      font-style: italic;
      font-size: 20px;
      text-align: left;
      font-weight: bold;
      color: red;
    }
  </style>
</head>
<body>
  <div class="font-style">
    This div uses font style to Verdana font, italic style, 20px
    size, bold weight, red color, and left aligned text.
  </div>
</body>
</html>
```

9. Create a web page that displays an image of size approximately 200 x 200 px, which gets itself repeated fully on the page. : (Use CSS)

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8" >
  <title>Repeated Image Background</title>
  <style>
    body {
      height: 100px;
      background-image: url("photo.jpg");
      background-repeat: repeat;
      /* Repeat both horizontally and vertically */
      background-size: 200px 200px;
    }
  </style>
</head>
<body>
</body>
</html>
```

10. Using CSS, create a web page that displays text “Welcome to CSS World” with an image as its border,
- Image repeats itself to fit the contents
 - Image should stretch to fit the contents
-

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <title>CSS Image Border</title>
  <link rel="stylesheet" href="style3.css" type="text/css">
</head>
<body>
  <div class="bordered-text">
    Welcome to CSS World
  </div>
</body>
</html>
```

style3.css

```
.bordered-text {
  border-width: 20px;
  border-style: solid;
  border-image-source: url('photo.jpg');
  border-image-repeat: repeat;
  padding: 20px;
  font-size: 24px;
  text-align: center;
  width: 300px;
  margin: 50px auto;
}
```

Style4.css

```
.bordered-text {  
  border-width: 20px;  
  border-style: solid;  
  border-image-source: url('photo.jpg');  
  border-image-slice: 30;  
  border-image-repeat: stretch;  
  padding: 20px;  
  font-size: 24px;  
  text-align: center;  
  width: fit-content;  
  margin: 50px auto;  
}
```
